

ALKSAT

GLOBAL MOBILE OPERATOR OF THE MARITIME INDUSTRY

Who we are?

We are hoping to perform to the satisfaction of all parties we are doing business with.

We are a dedicated group of individuals as a part of a big team, aimed toward providing Information technologies and Telecommunication services to the global maritime community.

Our main focus is various satellite communication platforms and their respective value-added services.

With a cumulated experience of several decades and our business relations with both supplier and customer ends of the market, we are hoping to perform to the satisfaction of all parties we are doing business with.

Our mission is to provide reliable, feasible, and accessible Information and Telecommunication services to the Global Maritime community.

Partners:

ECHOSTAR

INTELSAT.

MARLINK

HUGHES

VERIZON

VSAT Services

We are providing Global Maritime Satellite communication services by using Intelsat's fleet and FLEX products.

As such our service features are:

- Powered by Intelsat Flex Platform KU VSAT with 16 SATELLITES and 145+ Beams World largest satellite Fleet
- Fully Managed
- Dedicated bandwidth for VOIP and Management
- Bandwidth Management to ensure excellent customer experience without congestions
- Offered in 45cm , 60cm and 100cm classes
- Flexible, cost-effective packages for regional & global services
- Fully automated and seamless beam switching

VSAT Services

Our coverage area is literally global, covering all major sea routes.

VSAT Services

Our reliability and consistency come from the following factors:

- Unique powerful multi-layered coverage integrating Intelsat
- Epic HTS and wide beams
- Simplified and unified ecosystem
- The HTS coverage and layers of wide beam capacity add resilience and redundancy to the ShipSat HTS service
- Ships have access to multiple satellites across the globe
- Reducing and eliminating blockages from vessel obstructions

Our predefined service models are:

HTS-100 MIR 1024/512kbps

HTS-100 MIR 2048/512kbps

HTS-100 MIR 5120/1024kbps

HTS-100 MIR 10240/3072kbps

In order to provide our services, we are using 1M Ku-Band GEO/MEO/LEO VSAT Terminal compatible Z10MK4 antennae with iDirect iq200 modems.

S BAND SERVICES

Keeping seafaring vessels and data connected has never been more important. From tracking to automation of technical systems to communications of crew and passengers makes it a requirement to have continuous access to communication networks.

S BAND SERVICES

Our service and coverage area:

We deliver reliable and affordable solutions by using EchoStar Mobile services and Hughes Network Systems' equipments. These services and equipment can provide your ships with the connectivity that is needed to make sure that communication is always available in waterways within and surrounding Europe. With a range of voice and data services and a choice of terminals, EchoStar Mobile ensures that vessels are guaranteed a highly available seamless service across Europe and the UK (including the Mediterranean and the North Sea).

S BAND SERVICES

Our three basic services are*:

Extra mobile voice integrated service
Mobile capacity service
Hybrid capacity service

All our services are being offered with several quota limits. For bigger fleets, we can offer Shared Corporate Allowance Plans (SCAP). Both for regular capacity applications and SCAP packages, please contact our sales team.

* For detailed information, you can visit our website. www.alksat.com

Inmarsat Services

In order to provide maritime vessels that needs small capacity, available everywhere, seamless connectivity we are providing Inmarsat's reliable and well known services to our customers.*

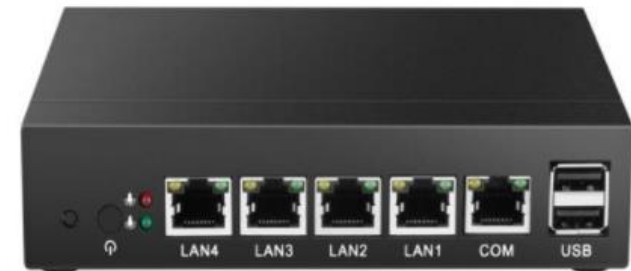

* For detailed information, you can visit our website. www.alksat.com

Inmarsat Services

While we can use any Inmarsat available device our customers already have in their inventory, we offer Intellian FB250 devices for new and replacing users

On top of these features, based on our experience with our customer fleet we bundle extra security features to our offering in order to increase service quality and customer satisfaction, while decreasing bandwidth wastage on quotas. For that, we supply our customers with compact firewalls

THANKS & BEST REGARDS
